Escape	2014	Louisville	1.6L, 2.0L, 2.5L	February 14, 2014 through March 7, 2014

Affected vehicles are identified in OASIS. In addition, for a list of vehicles assigned to your dealership, visit <https://web.fsavinlists.dealerconnection.com>. This information will be available on May 5, 2015.

REASON FOR THIS SAFETY RECALL

In some of the affected vehicles, the fuel pump may have been manufactured incorrectly, leading to increased susceptibility to mechanical pump seizure accompanied by a loss of fuel pressure. This may result in a no start condition, or an engine stall without warning or the ability to restart the vehicle. An engine stall without warning while driving increases the risk of a crash.

New! SERVICE ACTION

A complete Dealer Bulletin will be provided to dealers the week of **June 15, 2015** when it is anticipated that parts ordering information and repair instructions will be available to support this safety recall.

CUSTOMER NOTIFICATION

Owner Letters are expected to be mailed the week of June 22, 2015.

PLEASE NOTE:

Federal law requires dealers to complete this recall service before a new vehicle is delivered to the buyer or lessee. Violation of this requirement by a dealer could result in a civil penalty of up to \$7,000 per vehicle. Correct all vehicles in your new vehicle inventory prior to delivery
