DCSnet Message  
**Important**

Subject: **Wheel Flange Recall 15v-141**

Attached is the wheel flange recall bulletin. Please note that each dealer has been sent a new special tool to perform the procedure. This tool is different from the old tool and the new one must be used. One tool can be claimed per dealer under warranty so you will be reimbursed for this tool. Please read through the bulletin and repair procedure thoroughly as the repair procedure has also changed from the past.

Parts are readily available and can be ordered. The customer mailer will begin next week so please plan for an increase in customer calls.

Best regards,

Gordon McDonnell

Service and Technical Manager.
