RE: Stop Sale/Safety Recall: 2014-15 MDX, RLX & RLX Hybrid CMBS Error Safety Recall

On May 13, 2015 Acura notified NHTSA of a **Stop Sale** order and **Safety Recall** for 19,502 model year 2014-15, MDX, RLX, and 2014 RLX Sport Hybrid vehicles. Any new or used vehicles in dealer stock must be repaired per the relevant service bulletin prior to sale. **Refer to the eResponsibility report or VIN Inquiry status to determine which vehicles in your inventory are affected.**

Problem

Under certain driving conditions, the Collision Mitigation Braking System (CMBS) may unexpectedly activate while operating the vehicle. The system may lock onto an incorrect target and apply emergency braking through the CMBS. If the CMBS applies unexpected emergency braking force during normal operation, it could increase the risk of a crash.

Repair

Affected vehicles require a software update via the HDS to correct the CMBS system.

Software

Software to complete this safety recall is currently being developed. Once the software is ready, Acura will issue software and update information via service bulletin. Dealers will be notified as the software packages are released.

Warranty

Warranty information will be detailed in service bulletins 15-029, *MDX CMBS Error*, 15-030, *RLX CMBS Error*, and 15-031, *RLX Hybrid CMBS Error*. Note that bulletins will be revised as software becomes available, and they may have a staggered release.

Service Bulletin

In support of this recall, placeholder bulletins 15-029, 15-030, and 15-031 have been posted on SIS as of May 14, 2015. Once software is available, they will be revised to include software, update, and warranty information related to this campaign.

Customer Notification

Acura expects to complete initial customer notification by June 2015.

As always, make sure to check the iN VIN status inquiry to determine if a vehicle is eligible for this (or any) open recall.
