If you have a crash, an airbag deployment could result in injury or death.

WHY DOES MY [2001] [HONDA ACCORD] NEED REPAIR?

Honda has decided that a defect which relates to motor vehicle safety exists in certain vehicles. In some vehicles, the driver side front airbag inflator could produce excessive internal pressure leading to a rupture upon deployment. In the event of an inflator rupture, metal fragments could pass through the airbag cushion material and possibly hit you or others in the vehicle. Past ruptures like this have killed or injured vehicle drivers. Due to the severity of this defect, please call us immediately. Do not delay in contacting us. Alternative transportation is available pending repair.
