WHY DOES MY 2001 HONDA ACCORD NEED REPAIR?

Honda has decided that a defect which relates to motor vehicle safety exists in certain vehicles. In some vehicles, the driver side front airbag inflator could produce excessive internal pressure upon deployment. If an affected airbag deploys, the increased internal pressure may cause the inflator to rupture (break apart). In the event of an inflator rupture, metal fragments could pass through the airbag cushion material and possibly hit you or others in the vehicle. Past ruptures like this have killed or injured vehicle drivers. Due to the severity of this defect, please call us immediately. Do not delay in contacting us.

Honda will repair your vehicle free of charge (parts and labor).

Your Honda dealer will replace the potentially affected driver's side front airbag inflator with a new one. This free service should take less than 30 minutes to complete, but your Honda dealer may require your vehicle for a longer period of time based upon their work schedule. Honda believes that sufficient parts are available for the repair. However, in the event that parts are not available, Honda will provide a loaner vehicle at no cost until the repair can be completed.
