**AFFECTED VEHICLES**

| Vehicle      | Model Year | Assembly Plant | Build Dates                                 |
|--------------|------------|----------------|---|
| Mustang 2.3L | 2015       | Flat Rock      | February 14, 2014 through February 10, 2015 |

Affected vehicles are identified in OASIS. In addition, for a list of vehicles assigned to your dealership, visit <https://web.fsavinlists.dealerconnection.com>. This information will be available on May 26, 2015.

**REASON FOR THIS SAFETY RECALL**

In some of the affected vehicles, the underbody temperature may exceed design limits under certain driving conditions. If the fuel tank and vapor lines are exposed to elevated temperatures for a prolonged period of time, they may develop a fuel or vapor leak. A fuel leak in the presence of an ignition source can lead to a fire. If the parking brake cables are exposed to elevated temperatures for a prolonged period of time, the parking brake may not engage or disengage correctly, and may fail to hold the vehicle on a hill. As a result, the vehicle may move unexpectedly, which may increase the risk of injury.

**SERVICE ACTION**

DO NOT DEMONSTRATE OR DELIVER any of the affected vehicles involved in this safety recall. A complete Dealer Bulletin will be provided to dealers the week of June 22, 2015 when it is anticipated that parts ordering information and repair instructions will be available to support this safety recall.

**CUSTOMER NOTIFICATION**

Owners of record will be notified via first-class mail after repair instructions and parts ordering information have been provided to dealers.

**PLEASE NOTE:**

**Federal law requires dealers to complete this recall service before a new vehicle is delivered to the buyer or lessee. Violation of this requirement by a dealer could result in a civil penalty of up to \$7,000 per vehicle. Correct all vehicles in your new vehicle inventory prior to delivery**
