Subject: Upcoming Safety Recall – 15206
Safety Belt Lap Anchor Tensioner Cable

Models: 2011-2013 Chevrolet Caprice PPV
2008-2009 Pontiac G8

To: All General Motors Dealers

Attention: General Manager, Service Advisor, Service Manager, Parts and
Service Director, Parts Manager, New Vehicle Sales Manager,

General Motors has notified the National Highway Traffic Safety Administration (NHTSA) about an upcoming safety recall that involves 2011-2013 model year Chevrolet Caprice and 2008-2009 model year Pontiac G8 vehicles. The GM recall number is 15206.

General Motors has decided that a defect which relates to motor vehicle safety exists in 2011-2013 model year Chevrolet Caprice and 2008-2009 model year Pontiac G8 vehicles. The flexible steel cable that connects the safety belt to the vehicle at the outside of the front outboard seating positions can fatigue and separate over time as a result of occupant movement into the seat. In certain seating positions, the safety belt's flexible steel cable (or "tensioner cable") can be located in a forward position allowing the occupant to sit on top of it while entering the vehicle. This action can bend the steel cable over the seat side shield, which over time may cause the cable to fatigue and separate. In a crash, a fatigued cable could break, reducing the effectiveness of the vehicle's safety belts and increasing the risk of injury to the occupant.

Parts are not currently available, but when parts are available, dealers are to replace the front outboard lap seat belt anchor assemblies.

This is a courtesy notification to dealers. Dealers will be advised when the recall bulletin is scheduled for release.

The Investigate Vehicle History screen in the Global Warranty Management system has been updated for this upcoming safety recall. This action has been taken to assist dealers with determining which vehicles are involved so they can properly respond to customer inquiries. Please note the "N/A" under Release Date and the "Incomplete – Remedy Not Yet Available" message under Status. This means release of the recall bulletin is still pending and dealers should not attempt to perform any repairs at this time.
