RE: Stop Sale/Safety Recall: 2016 Pilot Seat Belt Inspection UPDATE

On Saturday, June 20, 2015, American Honda announced a stop sale and safety recall for 1,138 2016 Pilot vehicles due to concerns with third row seat belts. Any new or used vehicles in dealer stock must be repaired per service bulletin 15-047, *Safety Recall: 2016 Pilot Third Row Seat Belt Inspection*, prior to sale. **Refer to the eResponsibility report or VIN Inquiry status to determine which vehicles in your inventory are affected.**

**Problem**

A small number of 2016 Pilot VINs may have been produced with a mis-routed seatbelt. A mis-routed seat belt may not provide sufficient restraint in the event of a crash.

**Repair**

Affected vehicles require inspection of the third row seat belts. Seat belts exhibiting any mis-routing will need to be re-routed correctly.

**Part**

No parts are required to support this recall.

**Warranty**

Warranty information is detailed in service bulletin 15-047, *Safety Recall: 2016 Pilot Third Row Seat Belt Inspection*, which was posted on Service Information on June 23, 2015.

**Service Bulletin**

In support of this recall, an updated version of service bulletin 15-047 was posted to SIS on Tuesday, June 23, 2015.

**Customer Notification**

Honda expects to complete initial customer notification by July 2015.

As always, make sure to check the iN VIN status inquiry to determine if a vehicle is eligible for this (or any) open recall.
