Dear «Owner_name»,

Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2008-2009 Keystone Challenger, Everest, Fuzion, Montana, Montana Big Sky and Raptor Fifth Wheels and 2008-2009 Fuzion Travel Trailers. As a result, Keystone RV is conducting a safety recall.

Reason for this recall

It has been decided some IOTA ITS-50R transfer switches are experiencing heat related failures when exposed to the elevated electrical loads associated with RV use in higher ambient temperatures. The failure is causing connections and wiring in the transfer switch to degrade and heat leading to elevated case temperatures and an increased risk of electrical damage to other appliances from loss of neutral in a 240V circuit. Continued use of the vehicle without replacing the transfer switch increases the risk of a fire, personal injury, and property damage. The vehicles included in the recall are:

2008 - 2009 Challenger Fifth Wheels w/Generator Ready Option

2008 (8E750638 - 8E751126) 2009 (9E750001 - 9E750232)
