RE: SRS Warning Light Illuminates - Safety Recall Campaign
ATIN NO. ATIN-15-SR-011-A

AFFECTED VEHICLES: Certain 2012 i-MiEV, 2014 Mirage

PURPOSE

A safety recall campaign will be released today for SRS Warning Light in certain 2012 i-MiEV vehicles built between October 28, 2011 and September 7, 2012, and certain 2014 Mirage vehicles built between July 27, 2013 and November 20, 2013. This recall campaign will be conducted in the U.S. and Canada. The Recall Bulletin outlining the repair procedure will be available today on MEDIC and MDL.

Due to an improper manufacturing process control, the electrical resistance inside the impact sensor for the SRS air bag system may have increased. As a result, abnormal communication may be detected by the ECU causing the SRS warning light to illuminate. If a vehicle is involved in a collision necessitating frontal, side, and/or curtain air bag deployment when the SRS warning light is illuminated, frontal air bag deployment could be delayed and/or the side and curtain air bags may not deploy.

Dealers are requested to (1) replace the impact sensors for SRS and (2) use MUT-III to detect and delete related DTCs.

Some dealers have been force allocated stock using a formula based on the proximity and percentage of applicable registered VINs by ZIP code. Parts shipments were processed via the 'R' order type and started shipping along with your scheduled stock order beginning October 28, 2015. Dealers may place additional orders via the MDL. Please refer to Parts Bulletin 54-XX-02-15 for additional information.

Notification letters will be sent to owners of affected vehicles, requesting they contact their local Authorized Mitsubishi dealership to schedule an appointment to have this recall performed.

Affected new vehicle inventory VINs can be reviewed on the Mitsubishi Dealer Link in the **Most Recent: Open Campaign List** available under the service section of "e-reports." Dealers must review the Warranty Superscreen to confirm if any vehicles in their new or used vehicle inventories are affected, and conduct this campaign prior to delivering them. When checking for applicability of this campaign (C1511A), please check for and complete any other open campaigns. Always get the customer's approval before completing a campaign on a customer-owned vehicle.

IMPORTANT

Affected new or used inventory vehicles must be repaired before the vehicle is delivered. Dealers must check their inventory vehicles' VINs on the Warranty Superscreen to verify whether the vehicle is involved in this recall campaign. It is a violation of Federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by the notification under a sale or lease until the defect or noncompliance is remedied.
