New Safety Recall Advanced Communication – R57101615

FCA US LLC announced a safety recall on certain 2015 model year (KL) Jeep Cherokee vehicles equipped with a 2.4L engine (sales code ED6 or ED8).

Some of the above vehicles may have a misrouted Air Conditioning (A/C) hose. The A/C hose may come in contact with the engine exhaust manifold. Prolonged A/C hose contact with the engine exhaust manifold may result in a leak of the A/C refrigerant and/or A/C refrigerant oil. A/C refrigerant oil on the exhaust manifold could result in underhood smoke and/or an engine compartment fire.

FCA will conduct a voluntary safety recall on all involved vehicles. The A/C hose routing must be inspected. Vehicles found with a misrouted A/C hose will have the hose replaced.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
