## **New Safety Recall Advanced Communication – R71122315**

FCA US LLC announced a safety recall on certain 2011 and 2012 model year (WD) Dodge Durango and (WK) Jeep Grand Cherokee vehicles.

Some of the above vehicles may experience a high resistance short at the sun visor vanity lamp wiring after a service repair to the sun visor, headliner or while gaining access above the headliner. This may result in an inoperative vanity lamp and/or an electrical fire.

FCA will conduct a voluntary safety recall to inspect sun visor wiring on all involved vehicles to find those that may have had an improper service procedure. Any damaged sun visor wiring found during the inspection will be repaired. Also, a sun visor wiring spacer will be installed on all vehicles to reroute sun visor wiring to prevent wiring damage during any future service procedures.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
