The following information is in response to notification(s) received on Thursday, March 3<sup>rd</sup>, 2016 from the National Highway Traffic Safety Administration. This notification detailed preliminary reviews in regards to Trans Tech Bus Recall 15V-722. The notification stated that 4<sup>th</sup> Quarter 2015 filings for the “Quarterly Report” of the aforementioned recall had not been submitted by Trans Tech Bus. In response to this notification, Trans Tech Bus would like to present following.

Recall 15V-722 is not a recall originated by Trans Tech Bus, the originating recall campaign is 15E-068. The campaign 15E-068 was released by the Ricon Corporation. To elaborate further, the Ricon Corporation was both the originator of and continuing agent used to remedy the recall equipment. Trans Tech Bus did not file quarterly reports because it is believed that the Ricon Corporation is/was completing this metric.

The method of identification and logging of equipment in need of recall involves Serial Number identification, which is requested by Ricon when a customer submits a claim for a “15E-068 Parts Kit” for remedy. Thus, the reporting on Trans Tech Bus’s end would have to be requested from the Ricon Corporation and their logs. Furthermore, when this data is submitted, it will merely mirror the original recall quarterly report filings. Proof of usage for this method of remedy can be found in both the Dealer and Customer Notification submitted. The methods listed include the following;

*“The Ricon Corporation will supply, free of charge, a retrofit kit including instructions for installation”*

This document has been uploaded to the NHTSA servers on Monday, March 7<sup>th</sup>, 2016. If there are any comments or questions about the content, please contact me at your earliest convenience.

Respectfully,
