IMPORTANT SAFETY RECALL 15508

APRIL 2015

Dear IC Bus Customer,

This notice applies to your vehicle identified on the enclosed card and is being sent to you in accordance with the requirements of the National Highway Traffic Safety Administration and the Motor Vehicle Safety Act.

IC Bus has decided that a defect which relates to motor vehicle safety exists in certain RE commercial bus models built 4 November 2014 thru 18 November 2014.

REASON FOR THIS RECALL

The air brake drop hose fitting to the service brake chambers on the steer axle wheel ends may not be oriented correctly resulting in contact with the tire when wheels are turned to their fullest travel.

RISK TO MOTOR VEHICLE SAFETY

Drop hose contact with the tire may cause abrasion damage to the hose resulting in a pull condition during brake application or an unexpected increase in stopping distance and may contribute to a vehicle crash which may result in property damage, personal injury, or death.

DEFECT REMEDY

The remedy will involve properly orienting all fittings to the service chambers on the steer axle and replacement of any hose found with signs of abrasion or tire rub. Dealers have parts and instructions to repair your vehicle. The repair will be performed free of charge and take approximately 45 minutes to complete.
