

IMPORTANT SAFETY RECALL

June 2015

This notice applies to your vehicle, **VIN:** _____.

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that certain 2015 model year Chevrolet Colorado and GMC Canyon vehicles fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) 207, "Seating Systems". As a result, GM is conducting a recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- Your vehicle is involved in GM recall 15150.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

The seat-frame attachment hooks that secure the front of the driver's and/or front passenger's seat may not have been properly attached to the vehicle body during the assembly process. Where this condition is present, the front of the seat may not remain secured to the body of the vehicle in a crash, increasing the risk of injury.

What will we do?

Your GM dealer will inspect both front seat hooks. If the dealer discovers the seat hooks were not properly attached to the vehicle body, the affected seat(s) will be reinstalled. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual inspection and service correction time of approximately 25 to 45 minutes.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.

Do you have questions?

If you have questions or concerns that your dealer is unable to resolve, please contact the appropriate Customer Assistance Center at the number listed below.
