**Safety Recall Notice 15S19 / NHTSA Recall 15V-339  
Aviso de Revisión de Seguridad 15S19**

2015 Mustang  
Your Vehicle Identification Number (VIN):

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Ford Motor Company has decided that a defect which relates to motor vehicle safety exists in your vehicle, with the VIN shown above.

We apologize for this situation and want to assure you that, with your assistance, we will correct this condition. Our commitment, together with your dealer, is to provide you with the highest level of service and support.

**What is the issue?**

On your vehicle, it may be possible for the underbody temperature to exceed design limits under certain driving conditions. If the fuel tank and vapor lines are exposed to elevated temperatures for a prolonged period of time, they may develop a fuel or vapor leak. A fuel leak in the presence of an ignition source can lead to a fire. If the parking brake cables are exposed to elevated temperatures for a prolonged period of time, the parking brake may not engage or disengage correctly, and may fail to hold the vehicle on a hill. As a result, the vehicle may move unexpectedly, which may increase the risk of injury

**What will Ford and your dealer do?**

Ford Motor Company has authorized your dealer to replace the fuel tank shield, install thermal patches on the fuel tank and parking brake cable, and install thermal wraps on the vapor lines at no cost to you.

**How long will it take?**

The time needed for this repair is less than one-half day. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.

**What should you do?**

Please call your dealer without delay and request a service date for Recall 15S19. Provide the dealer with the VIN of your vehicle, which is printed near your name at the beginning of this letter.

**What should you do?**
