NHTSA RECALL 15V342

July 15, 2015

Dear Volvo Owner,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Volvo Cars of North America, LLC (Volvo) on behalf of Volvo Car Corporation has decided that a defect which relates to motor vehicle safety exists in certain model year 2016 XC90 vehicles.

The reason for Recall R89571:

Volvo has identified that the electrical wiring to the Side Impact Protection System (SIPS) in the front seats may have been incorrectly assembled. If the electrical wiring is incorrectly assembled there may be a risk of damage to the wiring insulation. If this condition occurs, the Supplemental Restraint System (SRS) warning light will illuminate and the vehicle On Board Diagnostic system will immediately alert the driver by message in the Driver Information Module (DIM). "SRS Airbag Service Urgent, Drive to workshop."

This issue could affect the Front Seat Side Impact Airbag restraint system function, potentially disabling the front seat side impact airbag(s), and increasing the risk of injury to vehicle occupants in a crash where a side impact airbag deployment is warranted.

Important:

If the SRS warning light is NOT illuminated and NO message is present in the instrument cluster, the SRS system is fully functioning.

The corrective action is inspection of wire insulation, and if needed, add a protective sleeve.

What you need to do:
