

IMPORTANT SAFETY RECALL

R43 / NHTSA 15V-517

This notice applies to your vehicle (VIN: xxxxxxxxxxxxxxxxxxxx).

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Dear: (Name)

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain **2014 and 2015 model year RAM trucks equipped with a 3.0L diesel engine and a 4x2 drivetrain.**

The problem is... **The battery wire harness on your truck may have been routed against the right engine mount frame bracket. Continuous battery wire harness contact with the right engine mount frame bracket could cause the battery wire harness sheathing to wear and create a high resistive short circuit. A high resistive short circuit could cause the vehicle to stall and/or an underhood electrical fire.**

What your dealer will do... **FCA will repair your vehicle free of charge.** To do this, your dealer will inspect the battery wire harness and replace it if necessary. The work will take about two hours to complete. However, additional time may be necessary depending on service schedules.

What you must do to ensure your safety... Simply **contact your Chrysler, Jeep, Dodge or RAM dealer** right away to schedule a service appointment. Ask the dealer to hold the parts for your vehicle or to order them before your appointment. **Please bring this letter with you to your dealer.**

If you need help... If you have questions or concerns which your dealer is unable to resolve, please contact the FCA Group Recall Assistance Center at either **fcarecalls.com** or 1-800-853-1403.
