

FRONT SUSPENSION TRACK BAR FRAME BRACKET

IMPORTANT SAFETY RECALL

R46 / NHTSA 15V-541

This notice applies to your vehicle (VIN: xxxxxxxxxxxxxxxxx).

This notification letter is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Dear: (Name)

FCA US LLC has decided that a defect, which relates to motor vehicle safety, exists in certain **2013 and 2014 model year 2500/3500 series RAM trucks and 3500 series RAM cab chassis trucks.**

The problem is... Some of the above vehicles may have a front suspension track bar frame bracket that was improperly welded during the manufacturing process. The front suspension track bar frame bracket welds may break and allow the front suspension track bar frame bracket to separate from the frame rail. A separated front suspension track bar frame bracket will cause diminished steering response and could cause a crash without warning.

What your dealer will do... FCA will repair your vehicle free of charge. To do this, your dealer will inspect the track bar bracket and replace the track bar bracket if cracked. Track bar bracket replacement could take several days. If the track bar bracket is not cracked, track bar reinforcement brackets will be installed. Installing the track bar reinforcement brackets will only take about 3 hours. However, additional time may be necessary depending on service schedules.

What you must do to ensure your safety... Simply contact your Chrysler, Jeep, Dodge or RAM dealer right away to schedule a service appointment. Ask the dealer to hold the parts for your vehicle or to order them before your appointment. **Please bring this letter with you to your dealer.**

If you need help... If you have questions or concerns which your dealer is unable to resolve, please contact the FCA Recall Assistance Center at 1-800-853-1403.
