IMPORTANT SAFETY RECALL

OWNER NOTIFICATION

NHTSA RECALL 15V-681

Dear Nissan owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety exists in some Nissan vehicles. Our records indicate that you own the Nissan vehicle identified by the Vehicle Identification Number on the inside of this notice.

Reason for Recall

The Occupant Classification System (OCS) in your vehicle is designed to classify the size of the front seat passenger and automatically turn OFF the front passenger air bag under some conditions. Our records indicate the OCS system in your vehicle may have been serviced with an incorrect specification part. If an incorrect service part was installed, the OCS in your vehicle might not properly classify a passenger seated in the front seat and turn OFF the front passenger air bag. This increases the risk of an injury to the front seat passenger in the event of a crash where front air bag deployment is warranted.

What Nissan Will Do

The OCS control unit will be reprogrammed to the correct specification. This remedy will be offered at no charge to the customer and should take less than an hour to complete. Your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

What You Should Do

We urge you to contact your Nissan dealer as soon as possible to arrange an appointment to have your vehicle repaired. Please bring this notice with you to your service appointment. Instructions have been sent to your Nissan dealer.

If the dealer fails, or is unable to make the necessary repairs free of charge, you may contact the National Consumer Affairs Department, Nissan North America, Inc., P.O.
