Dear Valued Customer,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Spartan Motors USA, Inc. has decided that a defect which relates to motor vehicle safety exists in certain 2014 and 2015 model year emergency response and defense vehicles equipped with a drive axle supplied by Marmon Harrington.

Please note: The Vehicle Identification Number that may be affected by this recall is located at the top of this letter.

What is the defect?

The hex nuts on the flange yoke assembly were not torqued to specification. In time the under torque condition could lose torque completely causing joint failure and loss of flange yoke/driveline. Although this could be detected by driveline vibration or nuts being loose, or missing, during a visual inspection, should a joint failure occur, the vehicle may become immobile. This could increase the risk of a crash.

Corrective Action:

The hex nuts will be inspected for proper torque. If improper torque is observed, the hex nuts should be tightened. This will be done at no charge.

Labor Time:

Applying the remedy may take up to 0.25 hour(s). Due to some service scheduling times, your service center may need your vehicle for a longer period.

What You Should Do:

Call Marmon Harrington 1-800-227-0727 or Spartan at 1-855-589-9836 to locate a qualified service center near you. Steps will be taken to ensure the recall is performed at the nearest service center.
