## IMPORTANT SAFETY RECALL

### OWNER NOTIFICATION

### NHTSA RECALL 15V-775

Dear Nissan Rogue owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that certain 2015 model year Rogue vehicle fails to conform to one of the requirements of Federal Motor Vehicle Safety Standard (FMVSS) No. 114 "Theft protection and rollaway prevention." Our records indicate that you own or lease the Nissan vehicle identified by the VIN inside this notice.

#### Reason for Recall

The automatic transmission shifter may not comply with the regulation requiring that the operator depress the brake pedal before shifting the vehicle out of the "Park" position. This is called "brake transmission shift interlock." Because of a transmission shifter knob issue, on some of the affected vehicles, the vehicle could be shifted out of the park position without depressing the brake pedal, which may increase the risk of a crash or injury to a nearby pedestrian.

#### What Nissan Will Do

Owners of all potentially affected vehicles are being notified to take their vehicle to a Nissan dealer for repair. The dealer will inspect the shift selector knob to determine if it is affected. If so, the shift selector knob will be replaced with a new one at no charge to the customer. This service, free for parts and labor, should take about an hour to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

#### What You Should Do

Contact any Nissan dealer at your earliest convenience in order to arrange an appointment to have your vehicle repaired. Please bring this notice with you to your service appointment.
