## **New Safety Recall Advanced Communication – R35072115**

FCA US LLC announced a safety recall on certain 2011 through 2014 model year (LD) Dodge Charger vehicles.

Some of the above vehicles may have Occupant Restraint Control (ORC) module software that contains side impact calibrations that are overly sensitive. Inadvertent Side Airbag Inflatable Curtain (SABIC), seat airbag, and/or seatbelt pre-tensioner deployment during certain driving conditions may increase the risk of a crash and/or vehicle occupant injury.

FCA will conduct a voluntary safety recall on all involved vehicles to reprogram the ORC module software.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
