Safety Recall: 2016 CR-V Driver's Airbag Module

AFFECTED VEHICLES

Year	Model	Trim	VIN Range
2016	CR-V	ALL	Check the iN VIN status for eligibility

BACKGROUND

The current defect thinking is that the airbag inflator which is part of the driver's airbag module may have been improperly stamped. Also, it could contain a defect in the material used to manufacture the airbag inflator's metal housing which, in the event of an airbag deployment, could cause inflator components to separate. If the inflator components separate, metal fragments could pass through the airbag cushion material possibly causing injury or fatality to vehicle occupants.

This bulletin will be revised in the future once the repair procedure, parts information, and warranty claim information are available.

CUSTOMER INFORMATION: The information in this bulletin is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely maintain your vehicle. These procedures should not be attempted by "do-it-yourselfers," and you should not assume this bulletin applies to your vehicle, or that your vehicle has the condition described. To determine whether this information applies, contact an authorized Honda automobile dealer.
