Dear «OWNER_NAME»:

Our records indicate *YOUR UNIT HAS NOT BEEN REMEDIED.* Please *DO NOT* ignore this notice!

Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2013-2015 Keystone Montana, 2014-2015 Keystone Raptor and 2015 Dutchmen Voltage Fifth Wheels. As a result, Keystone RV is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for
this recall***

It has been decided certain rivets marked as #96 or #55 which connect the 2nd & 3rd step at the hinge point and the inboard rivets marked as #08 which connect the top step tread to the upper hinge bracket on the quad step may shear or pull out during use causing the step assembly to separate. If the rivet shears and causes a person to fall it will lead to an increased risk of personal injury.

***What we
will do***

The remedy is to inspect the step and replace the above identified rivets with fasteners provided by Keystone. The service and parts required for this corrective action will be provided at no charge to you.
