IMPORTANT: SAFETY RECALL REMINDER

In May 2015, we notified you of a Safety Recall involving the rear shock absorber on your 2014/2015 Honda CBR1000S motorcycle. At the time, we advised owner's of the following:

During assembly of the rear shock, the piston nut may not have been correctly torqued. An improperly torqued piston nut could affect the performance of the rear shock, which may cause the rider to lose control of the motorcycle, increasing the risk of a crash.

According to our records, you have not yet had your affected CBR1000S repaired. Please call your authorized Honda motorcycle dealer to schedule an appointment as soon as possible. This recall repair will be performed free of charge.

If you have already had your CBR1000S repaired, or if you no longer own this motorcycle, please let us know by filling out the included, postage paid, Information Change Card. We will update our records and stop sending you reminder notices.

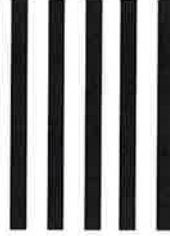

If you have any questions about this recall, your authorized Honda motorcycle dealer will be happy to assist you.

Sincerely,
American Honda Motor Co., Inc.
Motorcycle Division
