KEY INFORMATION

- Your vehicle is involved in an important safety recall
- Your safety is important to us. Schedule an appointment to have service procedure completed
- This procedure will be performed free of charge

Recall Number 15S14 - Steering Gear Motor Bolt Corrosion and Description:

What is the Issue? Your vehicle may experience loss of power steering assist while driving due to a corroded power steering motor attachment. When operated in high-corrosion environments associated with road salt use, it may be possible for the steering gear motor attachment bolts to fracture. If the steering gear motor becomes loose or detaches from the gear housing, it may result in a loss of power steering assist. The steering system would default to manual steering mode, requiring higher steering efforts at lower vehicle speeds, which may increase the risk of a crash.

What Are We Asking You To Do? Please contact your dealer to schedule an appointment to have this important service procedure completed. If you do not already have a servicing dealer, you can access www.Fordowner.com for dealer addresses, maps and driving instructions.

The vehicle owner is responsible for having this service action performed. Ford Motor Company reserves the right to deny coverage for any vehicle damage that may result from failure to have this recall performed on a timely basis. Therefore, please have this recall performed as soon as possible.
