Peterbilt has decided that a defect, which relates to motor vehicle safety, exists in vehicles manufactured with MX or MX-13 engines and the Delco-Remy 40si Alternator built between December 2010 and April 2015. The alternator charge cable on trucks equipped with a PACCAR MX or MX-13 engine and the Delco-Remy 40SI alternator may chafe against a formed metal Freon discharge line.

If the alternator cable rubs through its insulation, an electrical short may occur, increasing the risk of a fire.

Correction...	Re-route the alternator charge cable away from the metal freon line.
What you must do ...	Contact your dealer immediately to schedule an appointment
