IMPORTANT SAFETY RECALL

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

April 1, 2015

Paul Giampapa
Kenworth Truck Co.
10630 N.E. 38th Place
Kirkland, WA 98033

Dear Mr. Giampapa:

Dana Driveshaft Manufacturing, LLC has decided that a defect which relates to motor vehicle safety exists in 125 commercial vehicle lightweight driveshafts manufactured over the period June 21, 2012 to June 1, 2014. As a result, Dana is conducting a recall. Our records indicate that Dana supplied the subject driveshafts to you that were manufactured during the above period.

The affected driveshafts are being recalled because the weld may degrade over time as a result of flexing of the driveshaft components and galvanic corrosion. If the weld degrades to the point where its bond to the rear yoke may fail, it may lead to slippage between the driveshaft and yoke and, potentially, to loss of torque to the rear wheels.

Dana has contacted your customers directly and advised them that Dana will be responsible for **free replacement parts and repair service**. If you prefer to also contact your customers directly, of course you may do so. The estimated allowed time for driveshaft replacement is one hour.

The driveshaft serial numbers and VINs involved are listed below.

Serial Number: SA-345-189; SA-568-439

VIN: J366621; J409796

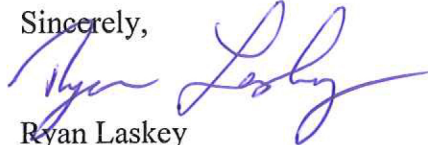

If you still have affected driveshafts in your possession, please contact Mike Schwanzl, Dana Commercial Vehicle Senior Manager of Sales at (615)260-5536 to arrange for replacement parts and repair service at **no charge**.

If, after contacting Dana regarding replacement and repair service, you believe that Dana has failed to remedy the defect without charge, or has failed to remedy the defect within 60 days

after you first contact Dana to obtain replacement, you may file a complaint with the Secretary of Transportation at Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Avenue, SE, Washington, DC 20590; or call the toll-free Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153; or go to <http://www.safercar.gov>.

Dana is committed to customer safety and satisfaction. If you have any questions or concerns about the information in this letter, please do not hesitate to contact the undersigned at (419)887-3374 or Ryan.Laskey@dana.com , or you may contact Mike Schwanzl at (615)260-5536.

Sincerely,

Ryan Laskey
Vice President, Commercial
Vehicle Engineering & Quality
