Description of the Safety Risk : A user of this vehicle might assume the tire data specified on the tag is accurate, thus leading him or her to overload the vehicle unknowingly. Stating the larger tire and rim on the Federal Placard would also misguide an owner or dealership in replacement of a tire and/or rim as needed. Potentially leading to the tire(s) impacting the bottom of the floor, unstable towing of the vehicle and loss of maneuverability, potentially causing a crash.
