Chronology :

04/12/16 After customer had two tires go flat and after the dealer inspected the unit it was thought that the axle placement was incorrect. QC inspected units to determine if this was an issue. They found on Model 176 only that the axles needed to be wider. This is a new model so we went back to the date that we started production on this model.

Description of Remedy :

Description of Remedy Program : Letters will be sent to dealers and customers notifying them of the recall. All units that may be affected will be inspected by a service center if defect is found a new axle will be sent to service center for replacement. Riverside will pay all labor, parts, and shipping cost associated with the recall.

How Remedy Component Differs from Recalled Component : New axle is 3" wider giving it greater clearance

Identify How/When Recall Condition was Corrected in Production : When defect was discovered, axles 3" longer replaced old axles.
