Description of Defect :

Description of the Defect : According to the equipment defect notifications (16E-042, 16E-043, and 16E-044) filed by Takata, the propellant wafers in some of the subject inflators may degrade over time, which could lead to over-aggressive combustion in the event the airbag is activated. Overly aggressive combustion creates excessive internal pressure when the inflator is activated, which may cause the inflator body to rupture.

December 10, 2019 Update

This submission is to inform NHTSA of Honda's intention to implement the "other" reporting category for removing certain eligible vehicles that are "no longer in service" from recall outreach efforts and reporting those vehicles in the "other" reporting category as permitted in the Third Amendment to the Coordinated Remedy Order (ACRO3), paragraphs 45 through 49. Vehicles eligible for the "other" reporting category will be included in forthcoming completion reports which are submitted every four weeks. As required by ACRO3, the VINs of all vehicles counted as "other" will remain active in Honda's data systems such that any search for the VIN will reflect an open recall status on the NHTSA web site, the Honda web site and any other data networks through which Honda communicates safety recall status information, including communications to Honda dealerships. For this reason, the number of potentially involved vehicles in this report will remain the same; however, Honda will consider them "remedied" for purposes of calculating the remedy completion under ACRO3, paragraph 35.

Chronology :

May 16, 2016

Takata submitted equipment defect notifications (16E-042, 16E-043, and 16E-044) to NHTSA that identified a safety-related defect in the subject passenger frontal airbag inflators.

May 23, 2016

Based on the determination by Takata that a safety-related defect exists in the subject inflators, as set forth in the equipment defect notification (16E-042, 16E-043, and 16E-044) filed by Takata on May 16, 2016, Honda Motor Co., Ltd., determined a safety defect exists and decided to conduct a safety recall.

Description of Remedy :

Description of Remedy Program : The owners of all affected vehicles will be contacted by mail and asked to take their vehicle to a Honda or Acura automobile dealer. The dealer will replace the passenger frontal airbag inflator with a new inflator, free of charge.
