Description of Defect :

Description of the Defect : The defect involves Bendix SR-5 spring brake valves. When parking the vehicles, it is possible for an internal leakage to develop in the SR-5 unit, resulting in slow to apply spring brakes. If the internal leakage occurs while the vehicle is uncoupled from the tractor, loss of air pressure in the vehicle reservoir will result, and it is possible that the spring brakes will be slow to apply on the vehicle.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : It is possible that the spring brakes will be slow to apply on the vehicle.
