Description of Defect :

Description of the Defect : The MORryde ramp door design includes a Hinge Assembly at each outside bottom corner of the ramp door. According to MORryde, the puddle weld securing the hinge pin to the hinge plate may be insufficient.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : Based on documentation received from MORryde, if the puddle weld is not sufficiently welded, the hinge pin may separate from the hinge plate, leading the side of the door to shift. This condition could cause the springs to lift off the hinged end of the door and could cause the top of the door to swing down with more force than normal, increasing the risk of personal injury.

Description of the Cause : None Provided.

Identification of Any Warning that can Occur : None Provided.

Supplier Identification :

Component Manufacturer

Name : MORryde International, Inc.

Address : 1551 E Bristol Street

Elkhart INDIANA 46514

Country : United States

Chronology :

On December 15, 2016, a representative from MORryde verbally informed Forest River's – Office of Corporate Compliance of service bulletin the company was issuing concerning a welding issue with its ramp doors.

Forest River sought confirmation from the supplier of whether and where the affected ramp doors were used in Forest River vehicles and Forest River conducted an investigation of its own production records to confirm the use of the part. On December 16, Forest River's Corporate Committee reviewed the issue and decided to conduct a recall if it could be confirmed that the company used the part. On December 23, 2016, Forest River was able to confirm that the affected part had been used in certain Forest River vehicles.

On 11/20/18 during an internal audit it was determined that all XLR Hyperlite models were to be removed from the scope of affected vehicles as this specific part was not ever used on this model. US affected population is 366.

Description of Remedy :

How Remedy Component Differs from Recalled Component : Vehicles will be inspected using a check gauge and any welds that are insufficient will be repaired.

Identify How/When Recall Condition was Corrected in Production : None Supplied.

Recall Schedule :

Description of Recall Schedule : Forest River has the utmost urgency in our recalls. Forest River will send suspected VIN numbers to our third party vendor that is licensed to pull data on the current owner of the vehicles once a formal NHTSA I.D. is provided. Forest River intends on pushing the mailing out as soon as NHTSA provides any correction(s) and an Acknowledgement Letter.
