New Safety Recall Advanced Communication – S29042816

FCA US LLC (“FCA US”) announced an equipment safety recall on certain 2014 through 2016 model year RAM ProMaster and 2015 and 2016 model year RAM ProMaster City vehicles.

Some of the above vehicles may have had a Mopar Trailer Tow Group kit installed at a dealership or aftermarket service facility. The Mopar kits may have a trailer tow lighting control module with a software error causing inoperative trailer brake lights. Towing a trailer with inoperative brake lights could cause a crash.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) 571 - Lamps, Reflective Devices, and Associated Equipment.

FCA US will conduct a voluntary safety recall to replace the trailer tow light control module.

NOTE: If your dealership parts inventory has part number(s):

- **82213930AD (ProMaster VF)**
- **82214282AB (ProMaster Cab/Chassis VF)**
- **82214341AB / 82214341AC (ProMaster City VM)**
- **68229650AB (Module)**

Please return the above kit(s) to your Mopar facing parts depot.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
