## **New Safety Recall Advanced Communication – S03012616**

FCA US LLC (“FCA US”) announced a safety recall on certain 2011 through 2016 model year (LD) Dodge Charger vehicles built with an original equipment spare tire.

Some of the above vehicles may have a spare tire jack that could bend the body-side sill assembly during jack operation if wheel chocks are not used. Bending of the body-side sill during spare tire jack use may cause the vehicle to become unstable.

FCA US will conduct a voluntary safety recall to provide all involved vehicle owners with approved wheel chocks.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
