

**Subarunet Announcement**

**To: All Subaru Retailers**  
**From: Subaru of America, Inc.**  
**Date: March 2, 2016**

**Subject: Update: WQX-59 Tribeca Hood Latch Recall**

***Owner Notification***

Owner notification for this phase one interim repair will begin on Friday, March 4, 2016.

***Description of the Remedy***

Please refer to the WQX-59 Product Campaign Bulletin which is now posted on STIS, which includes a copy of the owner notification letter.

Final countermeasure parts are not yet available; therefore the recall remedy plan will be conducted in two phases:

1. The WQX-59 repair is the phase one interim repair.
2. Once the final countermeasure parts are available, a new Product Campaign Bulletin will be issued for the phase two final repair – WQY-60. At that time, any open WQX-59 coverage will be expired and customers will be notified to schedule the WQY-60 repair.

***Affected Vehicles***

Coverage for all affected vehicles must be confirmed by using the Vehicle Coverage Inquiry function on subarunet.com. This data is now available.

<b>Model Years</b>	<b>Model</b>	<b>Production Start Date</b>	<b>Production End Date</b>
2006-2014	Tribeca	November 16, 2004	January 27, 2014

- Because this recall will be conducted in two phases, both WQX-59 (phase one) and WQY-60 (phase two) will appear as open recalls on the Vehicle Coverage Inquiry for all affected vehicles.
- Until countermeasure parts are available for WQY-60 (phase two), the status for WQY-60 will display as “Open - Remedy Not Yet Available.”
- Once countermeasure parts are available for the WQY-60 (phase two) repair, any open WQX-59 coverage will be expired, and the status for WQY-60 will be changed to “Open.”
