RE: Safety Recall: Takata Driver's Airbag Ridgeline Inflator Kit UPDATE

In an iN message dated Wednesday, April 13, 2016, American Honda indicated concern with replacement airbag inflator P/N 04770-SJC-405 for the 2007-2014 Ridgeline. As of today, new replacement parts are available to support the model.

A revised version of service bulletin 16-016, Safety Recall: Takata Airbag Inflator has been posted to the Service Information System on Wednesday, June 8, 2016. The revision includes updated Ridgeline parts and repair information.

As with other models, repair kits are in short supply. As such, initial parts will be allocated according to critical backorder situation. Once the CBO situation is cleared, parts will be released based on backorder age. Parts supply is expected to remain tight for these and other affected models until late summer, 2016.
