Subject: Takata Final Remedy Rollout – Date Change
Phase-out for Audi Safety Recall 69N1 - TAKATA SDI Driver Inflator

Due to unforeseen circumstances, the final remedy parts and repair instructions for the 69N1 recall replacement are now expected on or about February 01, 2018.

In the interim, if you have rescheduled any 69N1 appointments for this week, please reach out to those customers regarding this delay and reschedule accordingly.

As a reminder, no allocation requests to the Parts Dealer Support Team will be honored prior to the final remedy. You will see a rejected line item for the affected part numbers if your dealership currently has any on backorder. However, final solution parts will be allocated to you based on previous orders submitted.

IMPORTANT REMINDER ON VEHICLES AFFECTED BY SAFETY & COMPLIANCE RECALLS

New Vehicles in Dealer Inventory: It is a violation of Federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification under a sale or lease until the defect or noncompliance is remedied. By law, dealers must correct, prior to delivery for sale or lease, any vehicle that fails to comply with an applicable Federal Motor Vehicle Safety Standard or that contains a defect relating to motor vehicle safety.

Pre-Owned Vehicles in Dealer Inventory: Dealers should not deliver any pre-owned vehicles in their inventory which are involved in a safety or compliance recall until the defect has been remedied.

If you have any questions or require additional assistance, please contact Warranty.
