URGENT - DISTRIBUTE IMMEDIATELY

Date: March 1, 2016

Subject: Stop Delivery Order for Upcoming Safety Recall 28030

Models: 2016 Chevrolet Colorado, Malibu  
2016 GMC Canyon

To: All Chevrolet and GMC Dealers

**STOP DELIVERY ORDER**

Effective immediately, stop the delivery of certain 2016 model year Chevrolet Colorado, Chevrolet Malibu and GMC Canyon vehicles in new or used vehicle inventory. General Motors has notified the National Highway Traffic Safety Administration (NHTSA) about an upcoming safety recall that involves these vehicles. The GM recall number is 28030.

It is a violation of federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification until the defect is remedied. Dealers must follow normal policy and procedure and check the Investigate Vehicle History (IVH) prior to releasing any vehicle to a customer.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2016 model year Chevrolet Colorado, Chevrolet Malibu, and GMC Canyon vehicles. In these vehicles, the second stage of the driver frontal airbag may not deploy properly in certain high-speed crashes. If the vehicle is involved in a high-speed crash that triggers the second-stage deployment of the driver frontal airbag, the second stage of the inflator may not fill the airbag as completely and as quickly as designed, which could lead to an increased risk of injury to the driver.

To correct this condition, dealers will replace the driver frontal airbag module.

Until further instructions are received, involved vehicles that are in dealers' possession (dealer new or used vehicle inventory, GM Certified Used, courtesy transportation vehicles, dealer shuttle vehicles, etc.) must be held and not delivered to customers, dealer-traded, released to auction, used for demonstration purposes or dealer use. All GM Certified Used vehicles currently in the dealers' inventory within the Certified Pre-Owned Inventory System (CPOIS) will be de-certified.

The Investigate Vehicle History (IVH) screen in the Global Warranty Management (GWM) system will be updated for this upcoming recall on March 2, 2016. This action has been taken to assist dealers with determining which vehicles are involved so they can properly respond to customer inquiries.

A list of involved vehicles that have been identified as being in dealer new vehicle inventory is attached to this message. It is sorted by dealer Business Associate Code (BAC) for easy reference. Your dealership's BAC will not be listed if none of the involved vehicles are currently in your new vehicle inventory. A file identifying involved

vehicles in dealer used inventory will be published in GM GlobalConnect, under the Service tab in Field Action Inventory Reports.

Until the recall bulletin is released, the Investigate Vehicle History (IVH) screen in the Global Warranty Management (GWM) system will display "N/A" under Release Date and "Incomplete – Remedy not yet available" under Status. This means the required repair is not yet available and dealers should not attempt to perform any repairs.

We are working with the supplier to obtain the required parts as quickly as possible. When a sufficient quantity of parts are available, the recall bulletin will be released and dealers can begin repairing vehicles.

END OF MESSAGE
