URGENT - DISTRIBUTE IMMEDIATELY

Date: April 19, 2016

Subject: Upcoming Safety Recalls 15815 and 15816
Front Passenger Airbag Inflator
Customer Advisory Letters Mailed

Models: 2008 Pontiac Vibe

To: All General Motors Dealers

On March 16, 2016, GM notified dealers of Toyota's decision to add all 2008 model year Pontiac Vibe vehicles to NHTSA recall 15V-285/15V-286, which is a recall of certain Takata-produced passenger airbag inflators that GM is currently executing (Safety Bulletins 14491 and 15406). For provisional tracking purposes, this additional vehicle population was assigned reference number 15815.

GM began notifying customers of their involvement in this recall on April 15, 2016. GM's customer letter states that the parts needed to repair vehicles are not currently available and that customers will receive another letter when the parts are available.

For parts-distribution purposes, this additional vehicle population has been segregated into two groups: (1) vehicles in a non-high absolute humidity region (non-HAH); and (2) vehicles in a high absolute humidity region (HAH). The non-HAH vehicles will remain under reference number 15815 while the HAH vehicles have been moved to reference number 15816. Consistent with NHTSA's Coordinated Remedy Order dated November 3, 2015, the distribution of parts will initially prioritize vehicles in the HAH region.

Copies of the respective customer advisory letters are attached to this message. Additional information will be provided as it becomes available.
