URGENT - DISTRIBUTE IMMEDIATELY

Date: March 16, 2016

Subject: Additional Vehicles Included in the Takata-Produced Passenger Airbag Inflator Recall - GM Reference Number 15815

Models: 2008 Pontiac Vibe

To: All General Motors Dealers

Attention: General Manager, Service Advisor, Service Manager, Parts and Service Director, Parts Manager, Used Vehicle Sales Manager, and Warranty Administrator

GM is currently executing a safety recall relating to Takata-produced passenger airbag inflators in certain Pontiac Vibe vehicles (bulletins 14491 and 15406). The Pontiac Vibe was manufactured by New United Motor Manufacturing, Inc. (NUMMI), a joint venture between Toyota and GM.

Toyota recently added all 2008 model year Pontiac Vibe vehicles to this recall. Approximately 25,500 vehicles are being added. GM has assigned these vehicles to reference number 15815 for provisional tracking purposes. This number may change once the final vehicle population is determined and segregated into areas of high absolute humidity and non-high absolute humidity.

These additional vehicles have been updated in the Investigate Vehicle History (IVH) screen in the Global Warranty Management (GWM) system under number 15815. This action has been taken to assist dealers with determining which vehicles are involved so they can properly respond to customer inquiries.

Until further information becomes available, the IVH screen in the GWM system will display "N/A" under Release Date and "Incomplete – Remedy not yet available" under Status. This means the required repair is not yet available and dealers should not attempt to perform any repairs on these vehicles.
