

VOLKSWAGEN DEALERSHIP COMMUNICATION

Date: March 25, 2016
To: Dealer Principal, Sales Manager, Service Manager, Parts Manager and Warranty Administrator
Subject: Advance Notice – Safety Recall 46G4 – Brake Pedal Clip
2011-2016 MY Volkswagen Touareg

IMPORTANT NOTICE TO DEALERS - FOR IMMEDIATE DISTRIBUTION

Volkswagen has notified NHTSA and Transport Canada about the upcoming safety recall described in this letter.

| | |
|-----------------------------------|---|
| CODE | 46G4 |
| AFFECTED VEHICLES | 2011-2016 MY Volkswagen Touareg |
| RECALL DESCRIPTION | <p>A securing clip at the brake pedal hinge may be missing. If the clip is missing, the pedal pivot pin could start to move and the pedal could lose guidance. If this remains undiscovered, the pedal hinge could fracture after continued operation, allowing the pedal to dislodge. The customer may not be able to properly actuate the brakes with a dislodged brake pedal. A non-functional brake or reduced braking power could lead to a crash.</p> <p>No such incident is known in the U.S. or Canadian markets to date.</p> |
| VIN AND REPAIR INFORMATION | <p>We are working on a list of affected vehicles as well as an inspection/repair procedure and will make this information available as soon as possible.</p> <p>Affected vehicles will be inspected for presence of the securing clip. If missing, the clip will be assembled as required.</p> |

If you have any questions or require additional assistance, please contact Warranty. As always, any press inquiries should be directed to Volkswagen Public Relations.
