## **New Safety Recall Advanced Communication – S08050616**

FCA US LLC (“FCA US”) announced a safety recall on certain 2009 through 2016 model year (JC) Dodge Journey vehicles equipped with an engine block heater (sales code NHK).

Some of the above vehicles have been built with power steering return hoses that could rupture on a cold engine start up after the vehicle is exposed to extreme cold ambient temperatures for an extended period of time.

A loss of power steering assist increases the steering effort required to steer the vehicle. The increased steering effort could cause a crash without warning.

FCA US will conduct a voluntary safety recall to replace the power steering return hoses, steel tubes and power steering oil cooler.

Dealers will be notified of the launch of this safety recall by way of established methods used in the past.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries on involved vehicles.
