First of all, thanks for your great support on this recent recall. We realize it was a huge disruption to your business and we really appreciate how well it was handled by our retailers.

We are requesting our retailers to please enter any outstanding claims you may have for the recent steering column recall (WTD-65), by this Friday, July 8.

The purpose behind this is that we will pull open recalls from our claims system, Seibel, on Monday July 11, and send a second notice by email to these customers. We would prefer not to send this notice to a customer that has already had their vehicle repaired and returned. Thanks very much for your support.
