## **IMPORTANT SAFETY RECALL**

### **NHTSA Recall Campaign # 16V-305**

Dear Jayco Dealer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Jayco has determined that certain 2017 Jay Flight 27BHS “TH” Travel Trailers manufactured May 6 through May 9, 2016 fail to conform to the requirements of Federal Motor Vehicle Safety Standard No. 110, "Tire selection and rims and motor home/recreation vehicle trailer load carrying capacity information for motor vehicles with a GVWR of 4,536 kilograms (10,000 pounds) or less". Due to error of data entered to calculate the weight of the trailer, the affected travel trailers, have incorrect information printed on the Cargo Carrying Capacity (CCC) Label and Tire Label. This error creates the possibility that the vehicle could be loaded with the amount of cargo as stated on the incorrect labels and result in the vehicle being overloaded, exceeding the Gross Vehicle Weight Rating. Overloading may lead to issue with drivability and premature tire wear and subsequent tire failure of the fifth wheel, increasing the risk of personal injury or property damage.

The remedy is to place new labels with correct weight information on the trailer. All pertinent documents pertaining to this recall are on file under the Service and Parts tab of Jayco Partners.

Our records show the following unit is affected by this recall and is currently part of the inventory at your dealership and requires the Recall repair prior to being sold:
