Date: July 15, 2016

Subject: Upcoming Safety Recall 15826
Front Passenger Air Bag Inflator
Customer Advisory Letter Mailing

Models: 2009-2010 Pontiac Vibe

To: All General Motors Dealers

The Takata front passenger air bag inflator recall was recently expanded to include all 2009-2010 model year Pontiac Vibe vehicles. The total number of U.S. vehicles involved is 20,975.

As required by the National Highway Traffic Safety Agency (NHTSA), GM will begin notifying involved customers of this safety recall today. This letter advises customers that the parts needed to repair their vehicles are not currently available and that they will receive another letter when parts become available. A generic copy of the advisory letter is attached to this message for your reference. The actual letters received by customers will be personalized.

Until the recall bulletin is released, the Investigate Vehicle History (IVH) screen in Global Warranty Management (GWM) system will display "N/A" under Release Date and "Incomplete – Remedy not yet available" message under Status. This means the required repair is not yet available and dealers should not attempt to perform any repairs.

Additional information will be provided as it becomes available.
