RE: Stop Sale/Safety Recall: 2003-2011 Multi-Model Passenger's Airbag Inflator PARTS UPDATE 2

On Monday, May 23, 2016, Acura notified NHTSA of a stop sale and safety recall for specific model year 2003-2011 Acura vehicles due to passenger's airbag inflators that may experience over-pressurization upon deployment due to prolonged exposure to high temperatures and high absolute humidity.

Replacement part numbers for all affected models have been added to service bulletin 16-029, *Safety Recall: Takata Front Passenger's Airbag Inflator (Phase 1)*.

Replacement inflator kits are currently available for order for models covered by service bulletin 16-028. Parts to repair models covered by 16-029 remain unavailable.

16-028
2003-2006 MDX
2005-2011 RL

Repair procedures remain unavailable for the following model/model year combinations:

16-029
2009-2011 TSX
2011 TSX Wagon
2010-2011 ZDX

Service bulletin 16-029 will be updated again as more information becomes available.

We are working to expedite the supply of replacement parts for both service bulletins 16-029 as quickly as possible. **As with all VINS, vehicles in the model/model year ranges listed in service bulletins 16-028 and 16-029 must have a VIN status inquiry performed to verify whether they are included in the recall.** Accordingly, Acura is providing the verbiage below to facilitate service of these affected vehicles in cases where inflator recall repairs are not possible. Should an affected vehicle arrive for service that cannot be repaired, the client must be advised that their vehicle is subject to a recall. In addition, the following suggested text should be included on the repair order. This information should be printed out completely any time service is conducted on a vehicle with an open recall and parts are not available. Once replacement parts are available, the normal procedures under SOM 7.2.1 will apply for this recall.

Suggested Verbiage to be included on Repair Order:

"Client advised that:

The vehicle is subject to a recall affecting the passenger's front airbag inflator. Redesigned airbag inflators are not available for installation at this time. Once redesigned parts are available, the registered owner of the vehicle will receive notice to bring the vehicle in for replacement of the component."

Do **NOT** include this verbiage on repair orders for vehicles that are not a part of the recall listed above. Previously, some dealerships have made this verbiage standard on all repair orders, which created a problem with clients.
