

TO: Subaru Retailers
FROM: Subaru of America, Inc. Service Department
DATE: 09/30/2016
SUBJECT: **Takata Front Passenger Airbag Inflator Replacement Web-based Training (06L201010W)**

Subaru Service Training is pleased to announce the release of:

- **Takata Front Passenger Airbag Inflator Service (WBT) – Course Code: 06L201010W**

The **Takata Front Passenger Airbag Inflator Service** WBT is designed to be taken by all technicians that service Subaru vehicles. This short web-based course is an optional course for 2016 and is designed as a supplement (not a replacement) to the existing Takata service campaign found on STIS.

Stay tuned to STIS for revisions in the current campaign information and watch for refinements to the Takata web-based course.

As a short video-based WBT course designed to supplement the existing Takata service information, this course is designed to improve technician accuracy and efficiency. This course, at the current time, is not part of the core curriculum and does not positively or negatively affect the retailer's credit attainment score.

Due to the content covered in this self-study course it is suggested the Subaru service technician complete it as soon as possible. Completion of this course will provide additional applicable information to assist the technician in completing repairs correctly the first time.

The Technician will be granted 3 attempts to complete the required 5 question post test included in course with a passing score of 80% or higher.

Required Completion: All Dealer Service Technicians

Prerequisite Requirements:

Level One Core Curriculum complete

PC Requirements: See Subarunet.com - Help - Recommendations
