

IMPORTANT SAFETY RECALL
TMC# RC000119

Dear Dealer:

This **Safety Recall Notice** is sent to you in accordance with the requirements of the United States National Traffic and Motor Vehicle Safety Act and The Canadian Motor Vehicle Safety Act and is important for your safety.

Thor Motor Coach (TMC) has decided that a safety defect exists in certain TMC motorhomes based upon notification by Freightliner Custom Chassis (FCCC) that a defect which relates to motor vehicle safety exists in certain FCCC chassis that were used to manufacture TMC motorhomes. FCCC was issued recall 16V-321 by the National Highway and Safety Administration (NHTSA) to remedy this defect. To assist FCCC and NHTSA in identifying the final vehicles manufactured, TMC is also conducting a safety recall.

It has been decided that certain TMC motorhomes subject to this recall campaign have a defective chassis. On certain motorhome chassis when the throttle pedal is released, the associated pedal sensor may not return to zero, causing the engine brake to potentially not activate as expected. A sudden loss of an engine brake without warning on a motorhome may lead to a reduced brake capacity potentially increasing the risk of a vehicle crash. Owners should be directed to take their motorhome to an authorized FCCC dealer to have the repair completed.

Dealers that have stock units impacted by this recall will have a list of affected units attached to this recall bulletin. If any unit on this list has been retail sold you are asked to notify the retail owner as soon as possible of this recall because their vehicle was not registered at the time the retail notice was mailed. Please immediately register any retail sold units on this list. **As a reminder, you are required by law to complete this recall on any stock units in inventory prior to retail sale. Any vehicle lessor receiving this notice must forward a copy to the lessee within 10 days.**
